National Institute of Nursing Research
National Institute of Diabetes and Digestive and Kidney Diseases
Office of Research on Women's Health

This notice is an addendum to PA-96-070, which was published in the NIH Guide, Vol. 25, No. 28, August 16, 1996.

Within "Research Objectives and Experimental Approaches" the following two topics are added to factors that may explain or have an impact on CFS pathogenesis and areas need additional research:

- o association of altered sleep/wake physiology and the frequency of sleep disorders/disturbances in CFS, including sleep related periodic limb movements and sleep apnea
- o relationship between CFS and disordered circadian functions
